Tuesday morning was welcomed in by a beautiful sunrise over the crystal glass water of Lake Cormorant. Morning sessions gave way to a glorious day on the water fishing. Kampers returned to shore for free time of swimming, snacks, and (of course) circus practice. After dinner, kampers put the final touches on their lip syncs in preparation for an epic battle with the other cabins.

Every cabin did an amazing job mouthing the word *watermelon* to their favorite song. The night ended with cabin campfires and some delicious smores. The setting sun was a welcome site after such a big day.

### A Pioneer in Cancer Treatment

Dr. Robert Brunsvold made a special visit to Kamp KACE. Dr. Bob helped pioneer the use of anesthesia during major procedures performed on children as during their cancer treatment that previously were done without. Dr. Bob has made the unfortunate, but necessary *torturing* of pediatric oncology patients less painful.

### DNR To Restock Lake Cormorant

The DNR has indefinitely closed Lake Cormorant for all recreational fishing until they can restock the lake to acceptable fish counts. The depleted supply has been blamed on the 139 kampers that reeled in fish for 3 straight hours. The amazing volunteers barely had time to re-bait hooks among the controlled chaos.

Science Fact: It's always funny when Adam dresses like a woman
